DETAILED ACTION

1. This action is responsive to communication filed on 3 September 2004. Claims 1-46 are canceled; claims 47-63 are pending.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 47-63 are rejected under 35 U.S.C. 102(b) as being anticipated by Gelb et al. (hereinafter “Gelb”, US Patent 5,018,060).

As per claim 1, Gelb discloses a method of creating a data storage pool, comprising:
providing information for a plurality of storage resources in response to a user query
(Gelb, col. 7, line 54 – col. 8, line 62);

assigning at least one storage property to selected ones of the plurality of storage
resources in response to user instructions to define the data storage pool (Gelb, col. 7, line 54 –
col. 8, line 62);

receiving a logical expression to identify respective ones of the storage resources that are
available for a requested store operation based upon the storage properties assigned to the
selected ones of the storage resources (Gelb, col. 12, line 5 – col. 15, line 67, “the symbol |
indicates logic OR, && indicates a logic AND, ...”); and

allocating selected ones of the identified storage resources for the requested store operation (Gelb, col. 12, line 5 – col. 15, line 67).

As per claim 48, Gelb teach all the claimed subject matters as discussed in claim 47, and further teach the logical expression includes at least one logical operator and at least two storage properties (Gelb, col. 12, line 5 – col. 15, line 67).

As per claim 49, Gelb teach all the claimed subject matters as discussed in claim 48, and further teach the logical expression includes an amount of storage needed for the required store operation (Gelb, col. 4, lines 47-48, col. 17, lines 57-59).

As per claim 50, Gelb teach all the claimed subject matters as discussed in claim 47, and further teach receiving a new property as part of the logical expression (Gelb, col. 7, line 54 – col. 8, line 62).

As per claim 51, Gelb teach all the claimed subject matters as discussed in claim 47, and further teach assigning a particular one of the at least one storage properties to particular type of storage resource (Gelb, col. 7, line 54 – col. 8, line 62).

As per claim 52, Gelb teach all the claimed subject matters as discussed in claim 47, and further teach the plurality of storage resources includes logical volumes (Gelb, col. 17, lines 18-22).

As per claim 53, Gelb teach all the claimed subject matters as discussed in claim 47, and further teach receiving a user instruction to identify a storage resource as hand-off storage (Gelb, col. 7, line 54 – col. 8, line 62).

As per claim 54, Gelb teach all the claimed subject matters as discussed in claim 47, and further teach the user query is generated by a storage administrator (Gelb, col. 4, lines 57-58).

Art Unit: 2162

As per claim 55, Gelb teach all the claimed subject matters as discussed in claim 47, and further teach the logical expression is generated by a database administrator (Gelb, col. 13 – 14, “/* allow data base administrators to select */”).

Claims 56-63 are rejected on grounds corresponding to the reasons given above for claims 47-49 and 51.

Response to Arguments

4. Applicant's arguments with respect to claims 47-63 have been considered but are moot in view of the new ground(s) of rejection.
